

Spirit Gulch
 San Juan Range
 CO
Elevation: 11600 ft
Aspect: SE
Specifics:

Bill Nalli
 03/22/2020 - 2:00pm
Co-ord: 37.92721N, -107.70663W
Slope Angle: 33°
Wind Loading: no

Stability: Good **HS:** 177 **Layer Notes:**
Air Temperature: -7°C **PF:** 35 153-152cm: Problematic layer
Sky Cover: BKN **PS:** 20
Precipitation: S-1
Wind: NW Light Breeze

Notes: Old crust/facet layers have undergone numerous significant melt/freeze cycles and are now in the frozen state. Very strong. Rounding moist facets still exist from 80cm and below but it would take a huge load to break the K hard crusts above. Or another significant warm up. Much closer to the spring regime than I've seen yet this season.
