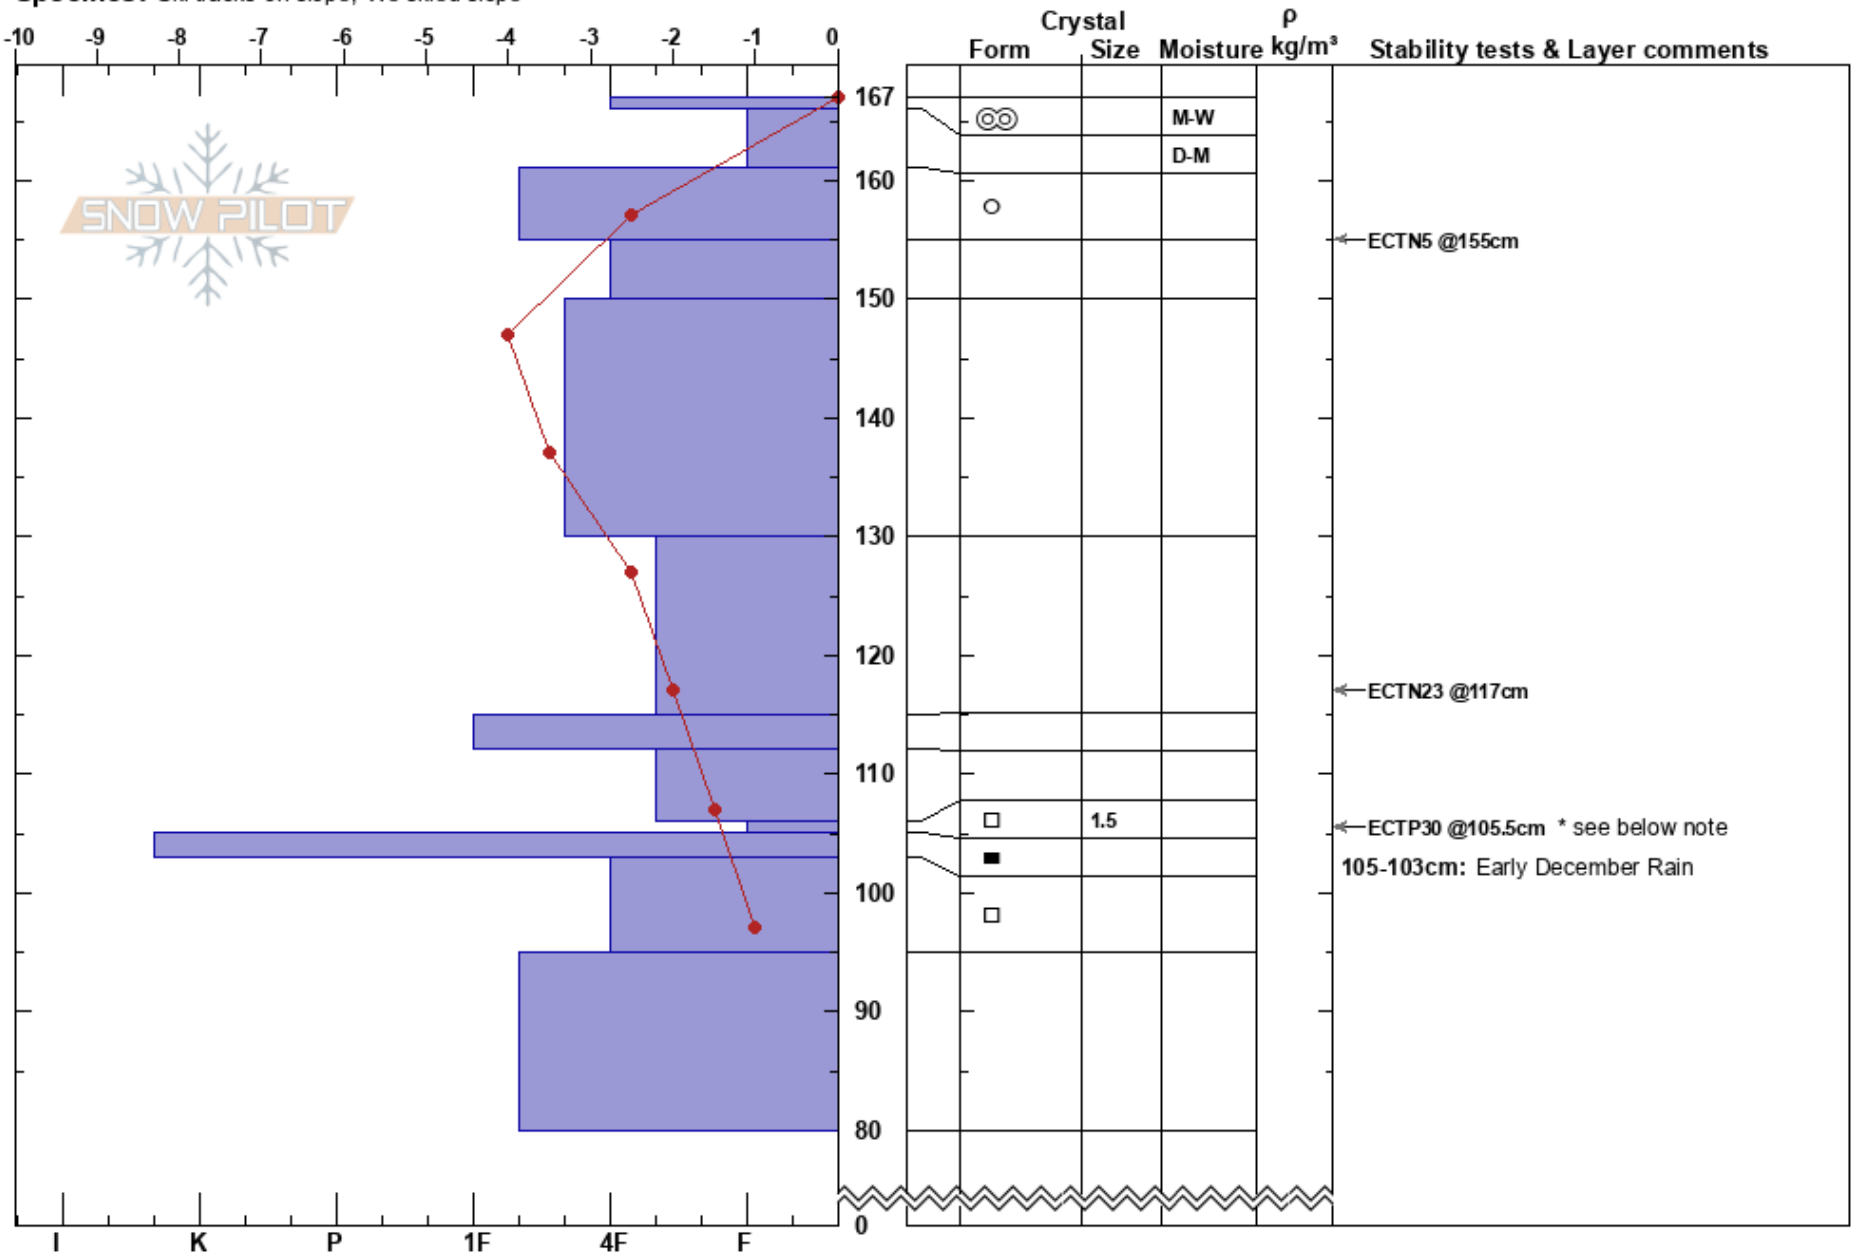
03/04/2020 - 12:33pm
Co-ord: 35.33642N, -111.68132W
Slope Angle: 35°
Wind Loading:

Stability:
Air Temperature: 5.5°C
Sky Cover: CLR
Precipitation: NO
Wind:

HS: 167

Layer Notes:
105-103cm: Early December Rain

Specifics: Ski tracks on slope; We skied slope



Notes: *ECTP30 @105.5: Isolated with cord down to 105cm from ground (top of knife+ rain-crust). Isolation in this snowpack is a little tough, and the isolation dimensions where off. At the bottom of the isolated column the width was 30cm on one side, and 22cm on the shovel tap side. We isolated a second ext. column (with proper dimensions) down to the same rain-crust, but could not reproduce a failure in the facet layer above the rain-crust.
