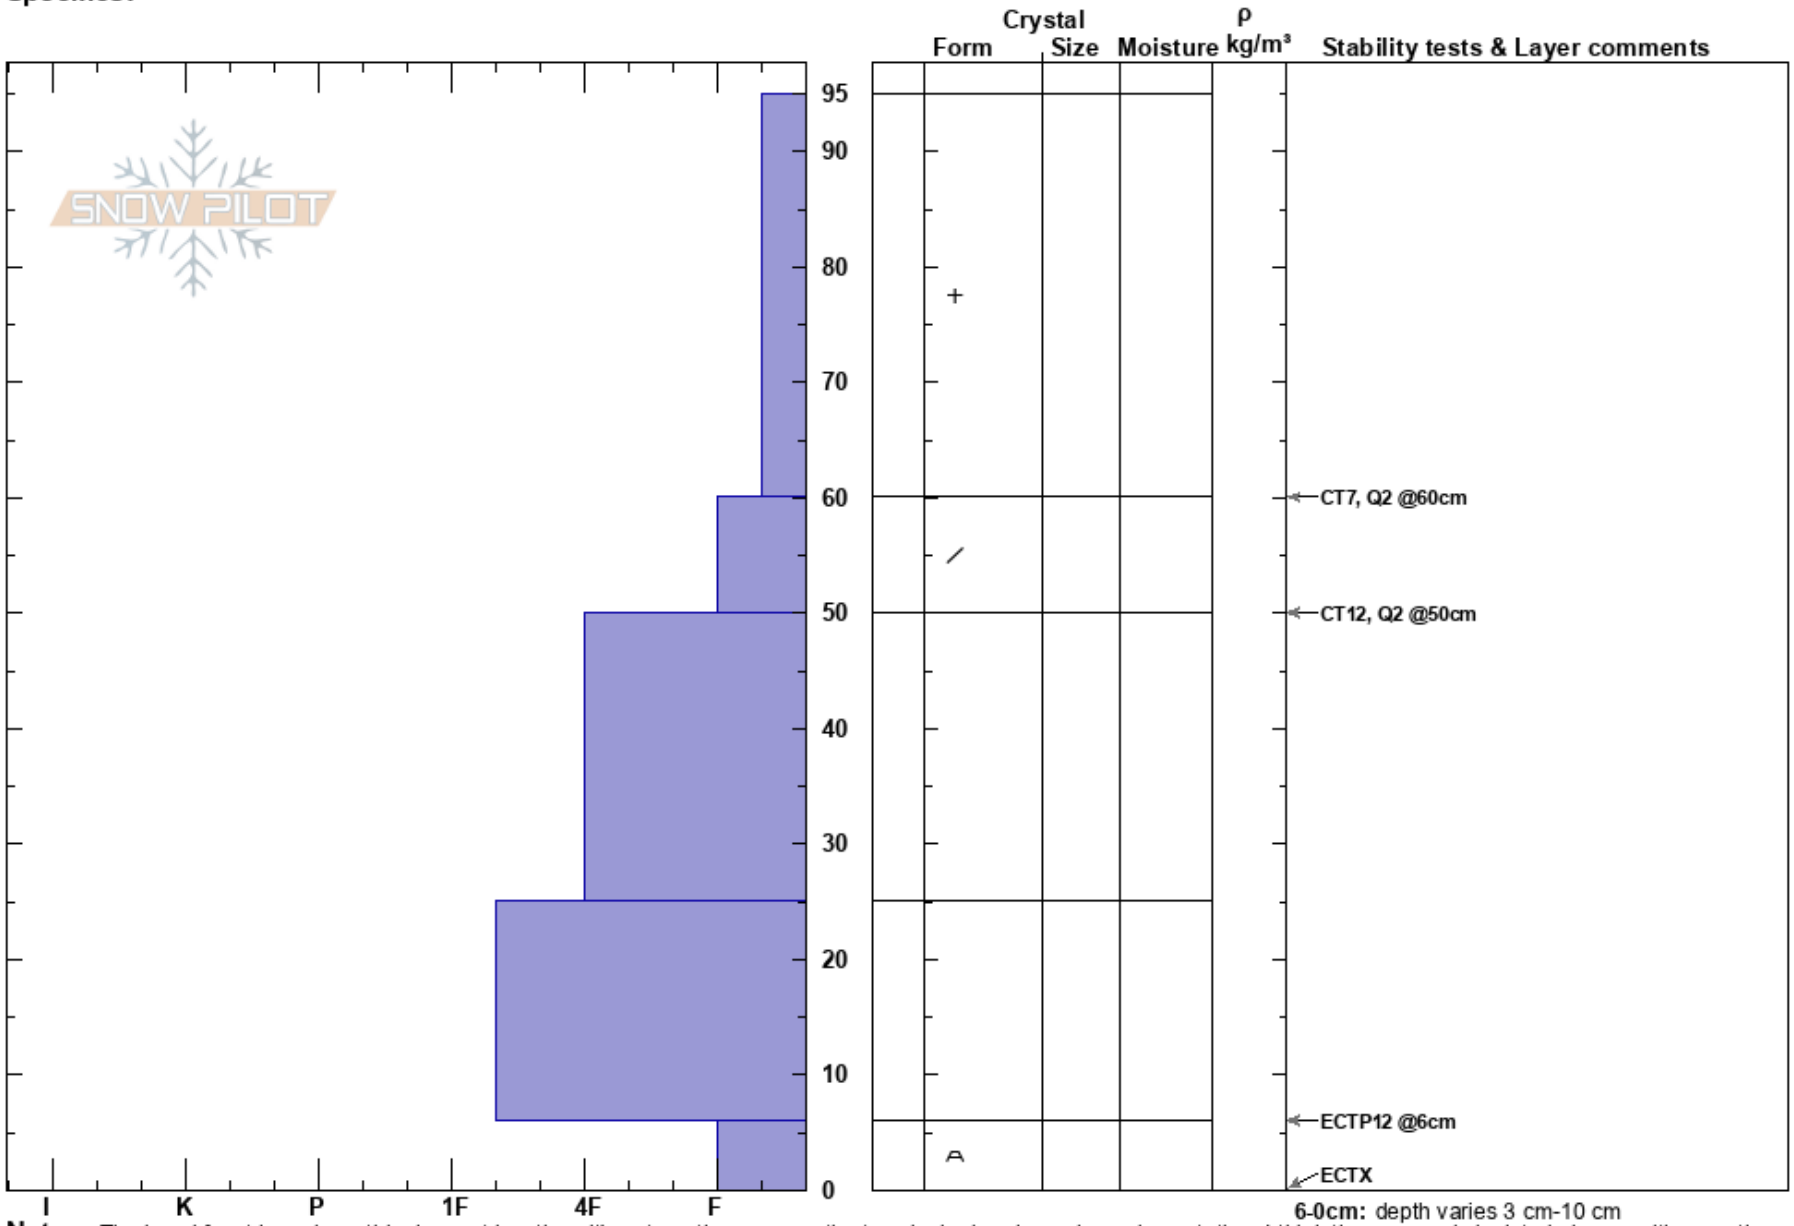
Lightning 2
Wasatch Range
UT
Elevation: 8713 ft
Aspect: 338°
Specifics:

Evelyn Lees
12/03/2018 - 12:00pm
Co-ord: 41.38650N, -111.78385W
Slope Angle: 30°
Wind Loading:

Stability: Very Good
Air Temperature:
Sky Cover: BKN
Precipitation: S1
Wind: Calm

HS: 95

Layer Notes:
6-0cm: depth varies 3 cm-10 cm
6-0cm: Problematic layer



Notes: The basal facet layer is so thin, in most locations it's not continuous over the terrain, broken by rocks and vegetation. I think there are only isolated places, with smooth ground like rock slabs or grass, where you could connect enough snow for a slide to fail on the depth hoar.
