Specifics: Snowmobile tracks on slope; We snowmobiled slope

Stability: Good HS: 153 Layer Notes:  
Air Temperature:  
Sky Cover: BKN  
Precipitation: NO  
Wind:

Notes: ECTP at 80 was result of 1+ hard layer on top of 4+ softer layer but not facets that concern me. There was a stripe in the pit wall of surface hoar and near surface facets and a crust but this layer would not break. The bottom 50 cm of the pit was layers of mostly 1 finger and Pencil hardness.
