

Wimpys  
 Teton Range  
 WY  
 Elevation: 9000 ft  
 Aspect: E  
 Specifics: Cracking; Ski tracks on slope

Brenden Cronin  
 01/08/2017 - 2:30pm  
 Co-ord:  
 Slope Angle: 32°  
 Wind Loading: previous

Stability:  
 Air Temperature:  
 Sky Cover: OVC  
 Precipitation: S1  
 Wind: SW Light Breeze

HS:260  
 PS: 15 214-211cm: Problematic layer

**Notes:** We did not ski this particular slope but headed south and skied a similar slope.  
 Observed some cracking on NE aspect as we traversed towards our ski run.
