Head of L hand Arthurs Central Wasatch

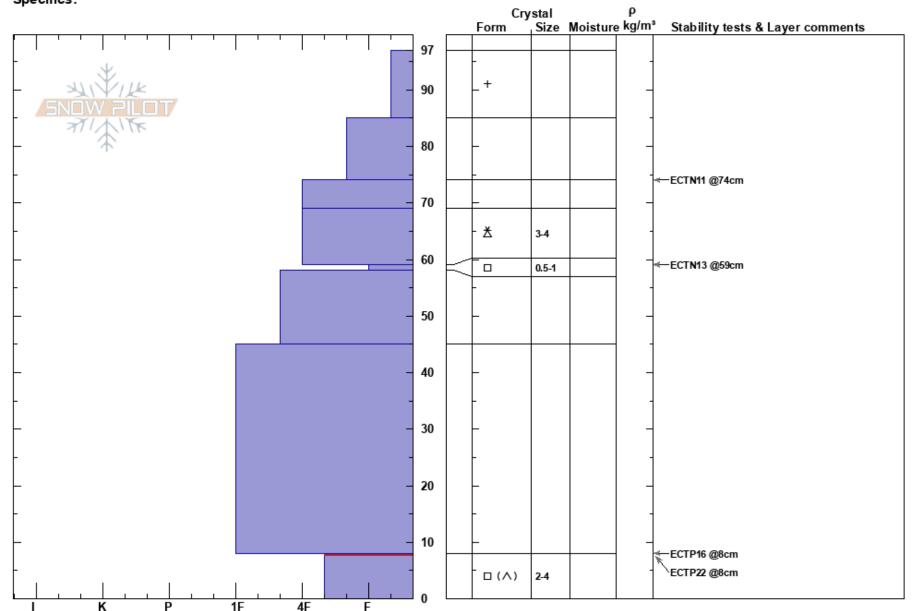

UT Co-ord Elevation: 8164 ft Slope

Elevation: 8164 ft Aspect: 360° Specifics: Mark Staples 12/27/2018 - 11:00am

Co-ord: 40.90369N, -111.77515W

Slope Angle: 24° Wind Loading: Stability: Air Temperature: Sky Cover: HS:97 Layer Notes: 8-0cm: Problematic layer

Precipitation: Wind:

Notes: Pit located just north of the powerlines at the head of the Left hand of Arthurs Fork. The main point of this pit was to look for facets at the ground to get a sense of what might exist at 9k in this area. At this elevation, I am not concerned about this layer. At 9k, I think the faceted layer is much thicker and a potential problem.
