Butler trailhead Wasatch Range

UT Elevation: 7161 ft

Aspect: 70°

Evelyn Lees 01/06/2019 - 10:45am

Slope Angle: 27° Wind Loading:

Co-ord: 40.64980N, -111.66215W Precipitation: S2 Wind:

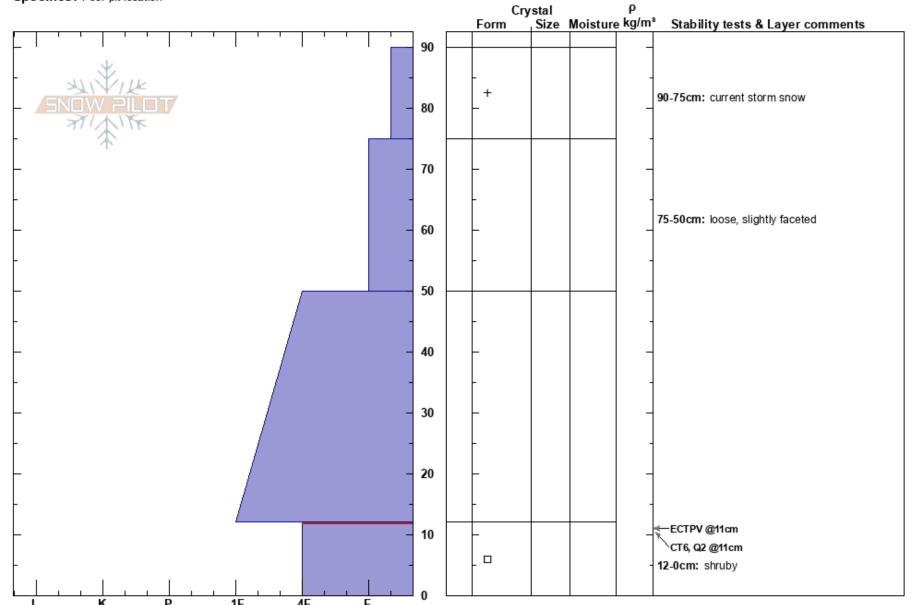

Stability: Air Temperature: Sky Cover: OVC

**HS**:90 Layer Notes: 90-75cm: current storm snow 75-50cm: loose, slightly faceted **PF**: 57

12-0cm: shruby

12-0cm: Problematic layer

Specifics: Poor pit location

Notes: Small intermittent shrubs at base of pit breaking up basal facet layer. No rain here. 50 - 75 cm layer may have been weak layer for yesterday's avalanches at higher elevations. Lacking a slab here, no wind load, not enough new snow.
