

Stability: HS:122 **Layer Notes:**
Air Temperature: 80-76cm: Problematic layer
Sky Cover: OVC
Precipitation: S1
Wind: S Light Breeze

Notes: 4f finger rounding facets between 80-76 are weak and will not support much additional weight. Heads up as this next storm approaches. Facets were much weaker higher up on the slope in the starting zone. CTM 12 Q2 at pit dug higher on slope.
