

Pro 1 Pit Submission
 Central Wasatch
 UT
 Elevation: 9700 ft
 Aspect: NW
 Specifics: Practice Pit

Ethan Judd
 02/12/2019 - 1:30pm
 Co-ord: 40.59267N, -111.61118E
 Slope Angle: 12°
 Wind Loading: no

Stability:
 Air Temperature: -6°C
 Sky Cover: BKN
 Precipitation: NO
 Wind: NW Moderate

HS:280
 Layer Notes:
 280-257cm: Wind skin???
 228-220cm: Rounds 0.3, Graupel 6
 175-165cm: Problematic layer

Notes: Dug a full profile pit for practice.

Neglected to measure PS and PF.

Was focused on identifying layers, hand-hardness, and snow grains and neglected get a full temperature profile. Incomplete and likely inaccurate because of possible misreading of dial on thermometer

Did not have time to perform an ECT in this pit.

Made a mistake when measuring depths of tests. Uncertain how accurate they are.

Definitely learning...
