Slope Angle: 26°
Wind Loading: no

Stability:
Air Temperature:
Sky Cover:
Precipitation:
Wind:

HS: 186
Layer Notes:
119-118.5cm: Problematic layer

Notes: Surface hoar stripe was very obvious. If there were no surface hoar, this would be a stable snowpack and the only problem would be upside down storm snow which is hardly a problem at this point.
