

Titmouse Ridge, low NE Mike Rheam
Teton Range 12/09/2019 - 11:00am
WY Co-ord: 43.49053N, -110.94994W
Elevation: 8039 ft
Aspect: Slope Angle:
Specifics: Collapsing, localized

Stability: Fair HS: 94
Air Temperature: 19°F PF: 95 40-15cm: weak, uneven MFC in middle
Sky Cover: SCT PS: 25 40-15cm: Problematic layer
Precipitation: NO
Wind: W Light Breeze

Notes: This pit shows more settlement(hardness) at the bottom of the snow received since Nov 25. This could be concentrating stresses and making slab more cohesive. Skied this terrain but stayed off the adjacent steeper gully.
