Warm Creek Beau Fredlund Stability: **HS**: 100 Layer Notes: Beartooths 12/12/2019 - 12:00pm Air Temperature: 32-0cm: Problematic layer

Co-ord: 45.00889N, -110.05868E Elevation: 8512 ft Slope Angle: 24° Precipitation: S1 Wind: SW Light Breeze Aspect: 115° Wind Loading:

Specifics: Cracking; Recent avalanche activity on similar slopes; We skied slope

MΤ

Sky Cover:

Notes: We observed one recent slab avalanche (possibly 4 days old) on an adjacent SE aspect at 8600'. The crown looked to be about 15m wide and 50cms deep, on what appeared to be a non wind loaded slope.
