Upper Senator Beck San Juan Range

CO

Elevation: 12924 ft Aspect: NE Specifics:

Co-ord: 37.91468N, -107.73207W Slope Angle: 30°

Wind Loading: yes

12/23/2019 - 3:00pm

Bill Nalli

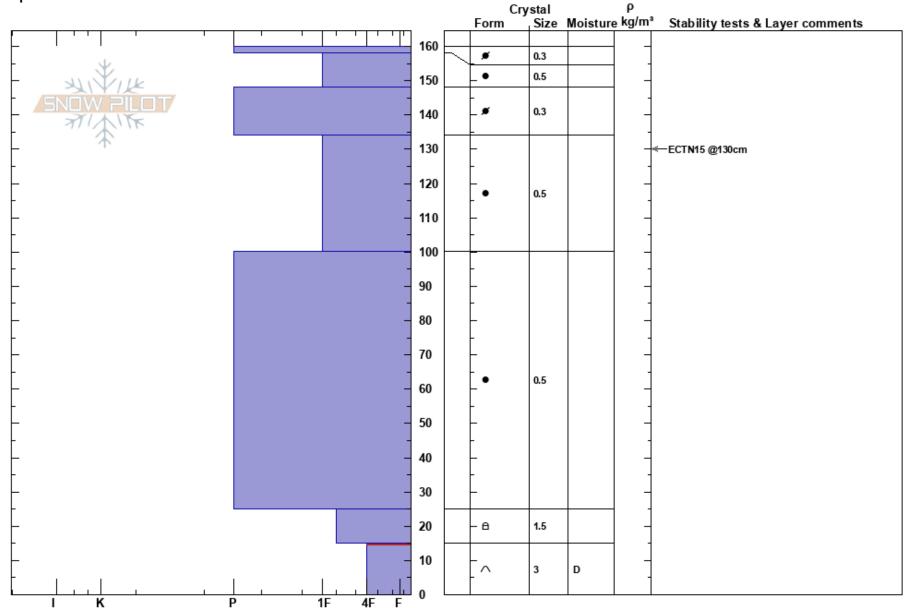

Stability: Good Air Temperature: -6°C

Sky Cover: OVC

HS:160 Layer Notes: PF: 15 15-0cm: Problematic layer

PS: 5

Precipitation: NO Wind: SW Moderate

Notes: This test slope location is deep and may not be completelty representative of HS throughout the basin. It does provide a good example of a deep strong slab with old October snow continuing to strengthen and round. It would take a massive load to break this slab and create an avalanche.
