Co-ord: 35.33269N, -111.64400W  
Slope Angle: 40°  
Wind Loading: no

Stability:  
Air Temperature:  
Sky Cover: CLR  
Precipitation: NO  
Wind: Calm

HS: 130  
PF: 60  
Layer Notes:

**Notes:** Pit dictated from a distance. Pit measurements from Miguel Fernandez, who stated that he had not dug a pit in over two years, while living in Bolivia. Slope appeared to have some debris on slope, likely from a very small SS release during the Christmas storm cycle. Looks similar to a nearby pit dug at lower elevation on easterly slope, 5 days prior - <https://snowpilot.org/node/19348>
