

Commodore Approach
San Juan Range
CO
Elevation: 11606 ft
Aspect: NE
Specifics: Collapsing, localized

Bill Nalli
02/07/2020 - 3:00pm
Co-ord: 37.91324N, -107.71067W
Slope Angle: 33°
Wind Loading: yes

Stability: Fair
Air Temperature: -8°C
Sky Cover: OVC
Precipitation: S1
Wind: NW Moderate

HS:250
PF: 100
PS: 30
189-175cm: Problematic layer

Layer Notes:

Notes: Storm snow is still adjusting. 50cm since 2/6, sits on 10cm from 2/4 above MF crust and NSFC below. Density inversion in the newest storm snow is still sensitive and reactive to moderate taps in stability tests. Lots of snow in a short time = unstable..but settling.
