Jones Crk. Low Alex Marienthal Stability: Very Poor HS: 125 Layer Notes:
Bridger Range 03/04/2017 - 12:05pm Air Temperature: 84-79cm: Problematic layer

MT Co-ord: 45.82500N, -110.94138W Sky Cover: BKN
Elevation: 7147 ft Slope Angle: 32° Precipitation: NO
Aspect: 325° Wind Loading: no Wind: SW Moderate

Specifics: Collapsing, widespread; Collapsing, localized; Recent avalanche activity on different slopes; Ski tracks on slope; We skied slope

**Notes:** Triggered 3-4 large, rumbling collapses as we ascended, prompting this pit. One person's skin track already ascended. We had two large collapses while breaking trail, then had two while on the already established skin track. Instability isolated to nearby similar terrain, but significant.
