

Senator Beck Low North
San Juan Range
CO
Elevation: 11859 ft
Aspect: SE
Specifics:

Bill Nalli
02/28/2020 - 4:00pm
Co-ord: 37.91156N, -107.71385W
Slope Angle: 38°
Wind Loading:

Stability: Fair
Air Temperature: 2°C
Sky Cover: FEW
Precipitation:
Wind: Calm

HS: 123
PF: 10
PS: 80
Layer Notes:
65-58cm: Problematic layer

Notes: Pit dug adjacent to HS-N-R2,D2.5-O that occurred 4 days prior on Feb 24. Initial slide was a new snow wind slab that stepped down into weak faceted snow mid-pack and at the ground. SE-E aspects still have persistent weak layers that if given the right load will fail. This structure is becoming much more isolated however as the warm temps and stronger sun help with sintering. CT failures suggest once the strength of the slab is reduced failures are still possible.
