

Steinskarfjellet high
 Kvaløya
 Norway
 Elevation: 463 m
 Aspect: E
 Specifics: Poor pit location

Paul Velsand
 14/03/2017 - 13:10
 Co-ord: 33W 640044E 7731831N
 Slope Angle: 20°
 Wind Loading: yes

Stability: **HS: 157**
 Air Temperature: 2°C
 Sky Cover: OVC
 Precipitation: S1
 Wind: S Moderate

PF: 25
 Layer Notes:
 100-94cm: Problematic layer
 30-0cm: Nearly impossible to dig in

Form	Crystal		Moisture	ρ kg/m³	Stability tests & Layer comments
	Size				
•	0.5		M		
⊖	0.5		D		
⊖	3-4		D		
⊖			D		30-0cm: Nearly impossible to dig in

Notes: Placed new temperature stake (depth at 130 cm). The pit is NOT representative for the snow depth in the area. The general snow depth is deeper than 157 cm.

Stability tests and density measurements were not done due to increasing wind and bad weather.
