

HS:157 **Layer Notes:**
PF:25 100-94cm: Problematic layer
 30-0cm: Nearly impossible to dig in

	Form	Crystal Size	Moisture	ρ kg/m ³	Stability tests & Layer comments
	●	0.5	M		
	⊕	0.5	D		
	♡	3-4	D		
	♡		D		30-0cm: Nearly impossible to dig in

Notes: Placed new temperature stake (depth at 130 cm). The pit is NOT representative for the snow depth in the area. The general snow depth is deeper than 157 cm.

Stability tests and density measurements were not done due to increasing wind and bad weather.
