

Hyalite Peak
Gallatin Range-N
MT
Elevation: 9605 ft
Aspect:
Specifics: We skied slope

Jordan Aid
03/26/2020 - 12:30pm
Co-ord: 45.38517N, -110.96046W
Slope Angle:
Wind Loading: yes

Stability:
Air Temperature: -6°C
Sky Cover: BKN
Precipitation: NO
Wind: NE Light Breeze

HS:297
PF: 45
PS: 45
297-237cm: Problematic layer

Notes: We dug two pits on different aspects and decided Hyalite Peak was acceptable for conditions. The new snow seemed to be bonding well with the older/firmer snow. Wind locally redirecting through the drainage, coming from the NE, prevailing winds coming from the SW. Wind loading began around around 1200-1300. Minor cornice growth and minor cornice sloughing. Cornice sloughs only ran about 100' downhill and only affected the top 10-20 cm of new snow.
