**HS:**200  
**Layer Notes:**  
200-185cm: new snow from today  
167-165cm: dirt layer from wind event  
165-161cm: Problematic layer

**Notes:** HS is more than 280cms. Skied a nearby NW aspect around 40 deg in steepness, and the skier triggered sluffs started initially slow, but eventually entrained a good bit of (new) snow, and became quite large, running full track.
