Co-ord:
Slope Angle: 40°
Wind Loading:

Stability:
Air Temperature: -2.7°C
Sky Cover: CLR
Precipitation: NO
Wind: Calm

HS: 145
Layer Notes:
 129-125cm: Problematic layer
 69-66cm: See note below.
 35-0cm: Friable crusts

Specifics: Pit dug in a Ski Area; We skied slope

Notes: Layer 7 is made up of an unusual form: 5mm-long needle-like crystals. Possible surface hoar that has been rain affected. This layer is very distinct and very fragile.
