

Cardiff Peak
Northern Wasatch
UT
Elevation: 10150 ft
Aspect: N
Specifics:

Bill Nalli
01/19/2021 - 10:00am
Co-ord: 40.59539N, -111.65337W
Slope Angle: 35°
Wind Loading: yes

Stability: Poor
Air Temperature: -11°C
Sky Cover: CLR
Precipitation: NO
Wind: E Moderate

HS: 108
PF: 95
PS: 12
Layer Notes:
78-77cm: solstice crust
51-41cm: Problematic layer

Notes: HS is barely one meter in late Jan. in one of the snowiest places in the Wasatch. Wild. As will the avalanches be if a load is ever applied to this structure. A couple of deteriorating crusts still exist in between progressively weaker facets toward the ground.
