Precipitation: S1 Wind: W Light Breeze

Notes: Dug 3 snowpits in the 8,500'-9,000' realm, on SE and E aspects all with similar results: the SH was present 20-25cms from surface, but was not propagating in ECT's. (first two snowpits appeared to be dug on old ski tracks). Also, minor collapsing felt on this layer while breaking trail- collapses in the 5-10' estimated diameter scale.
