Campbell Hollow Uinta Range UT

Elevation: 9737 ft

Aspect: 50°

Mark Staples 01/29/2021 - 12:30pm

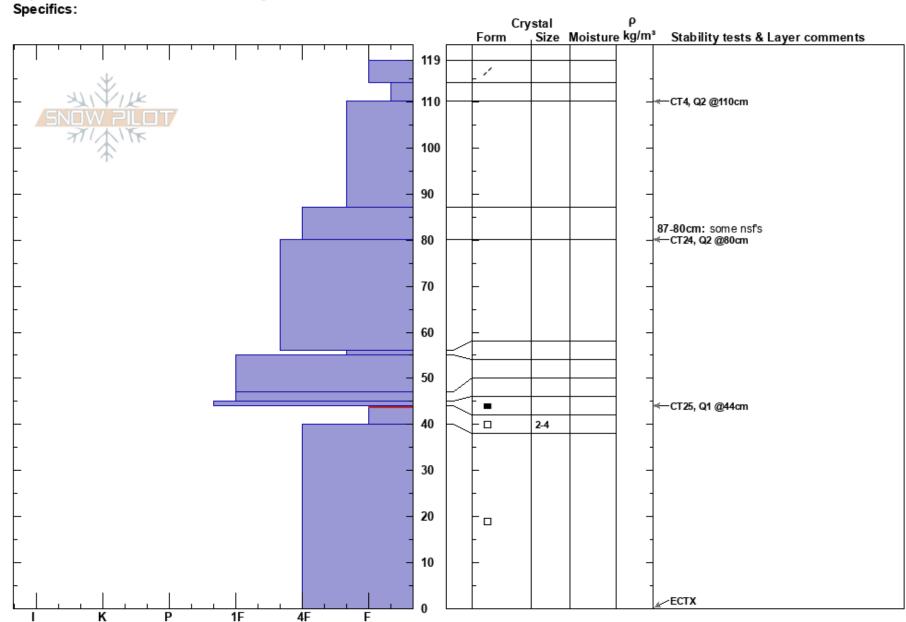

Co-ord: 40.45989N, -111.14962W

Slope Angle: 26° Wind Loading:

Stability: Air Temperature: Sky Cover:

HS:119 Layer Notes: PF: 119 87-80cm: some nsfs 44-40cm: Problematic layer

Precipitation: Wind:

Notes: Some nsfs seen at 80 cm, this layer could be more reactive in other places. Overall this snowpack felt like a slightly deeper and stronger snowpack than we've been seeing. ECT and RB would barely break on facets at 44.
