Point 12,140' Ann Mellick San Juan Range 02/11/2021 - 11:00am

Elevation: 12112 ft

Aspect: 70°

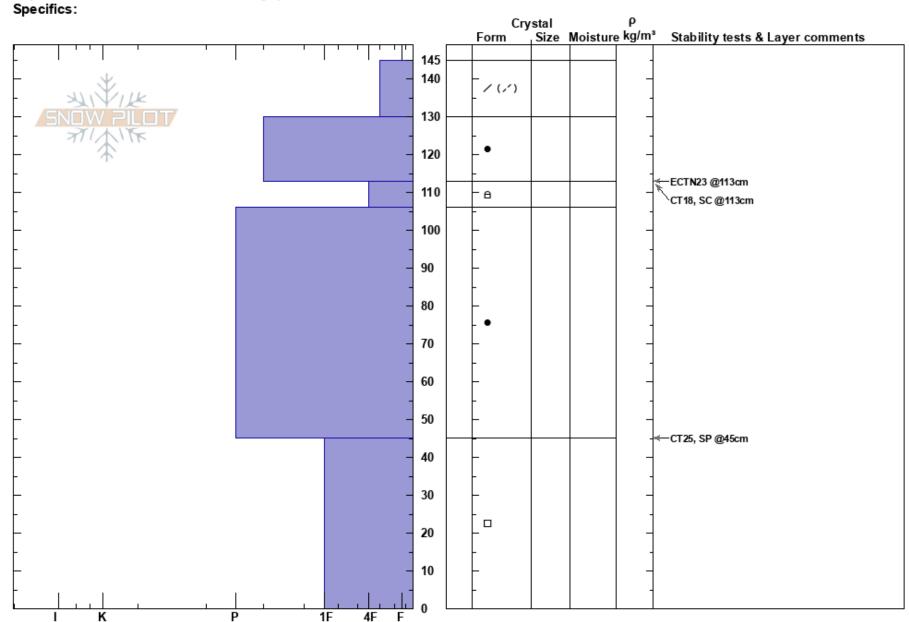

CO

Co-ord: 37.87588N, -107.70790W

Slope Angle: 32° Wind Loading: yes Stability: HS: 145 Layer Notes:

PF: 15 Air Temperature: Sky Cover: CLR PS: 15

Precipitation: NO Wind: SW Moderate

Notes: The weakest interface is >1m deep in the snowpack, but several weak interfaces persist in the upper snowpack as well. A slide triggered in the upper layers would likely step down to the deepest weak layer, resulting in a very large and dangerous avalanche.
