 Co-ord: 45.89915N, -110.97170W
 Slope Angle: 28°
 Wind Loading: yes

Stability:
 Air Temperature:
 Sky Cover: BKN
 Precipitation: S1
 Wind: W Moderate

HS: 75
 Layer Notes:
 15-0cm: rain/melt moist crust

Elevation: 8740 ft
 Aspect: 0°
 Specifics: Ski tracks on slope; We skied slope

Notes: M-S winds. Typical high variability snowpack structure of this area. Depth ranged from 2-4 ft (70-130cm). Layer of note is moist rain/melt crust on ground. Bonds well with warm/moist slab above. Graupel in this pit due to lower angle deposit zone.
