**Co-ord:** 37.87266N, -107.71494W  
**Slope Angle:** 31°  
**Wind Loading:**

**Stability:**  
**Air Temperature:** -3°C  
**Sky Cover:** OVC  
**Precipitation:** S-1  
**Wind:** SW Light Breeze

**HS:** 130  
**PF:** 35  
**PS:** 25

**Layer Notes:**  
104-99cm: Percolation tubes  
93-80cm: Percolation tubes  
80-75cm: Problematic layer  
75-71cm: Percolation tubes

**Notes:** Overall weak and transitional snowpack in this area. Water has made it about halfway through the pack, but it remains layered with plenty of strong-over-weak layering. Wet slab remain an major concern with spring warming.
