Wind: W

HS:63
Layer Notes:
19-10cm: Problematic layer

Notes: Westerly winds were blowing today, moving lots of snow along the high ridgelines. Snowpit was in a relatively deeper snowpack location. Was typically finding about HS 40- Near and along the ridgeline, I was getting lots of subtle collapsing and cracking (not making much sound- muffled by the new snow?), but the cracks were traveling 30' or more in many places.
