west Woody Ridge Absaroka Range

MΤ Elevation: 9791 ft

Aspect: 300°

Specifics: We skied slope

Beau Fredlund 12/21/2021 - 1:00pm

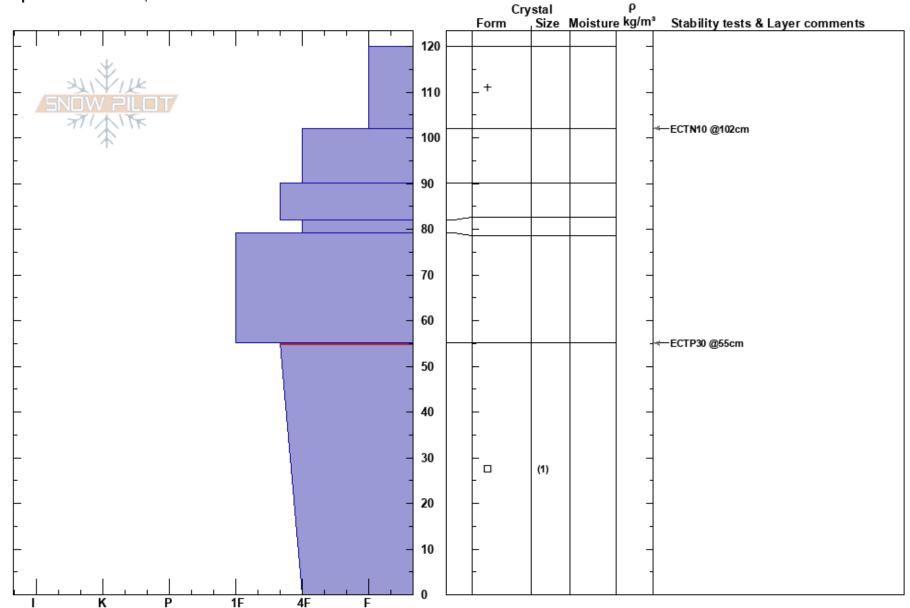

Co-ord: 44.98505N, -109.92487E

Slope Angle: 30° Wind Loading:

Stability: HS:120 Layer Notes:

Air Temperature: 55-0cm: Problematic layer Sky Cover: BKN

Precipitation: Wind: SW Moderate

Notes: Adjacent slopes had significant wind effect from recent, moderate to strong SW winds. These wind affected slopes had surface wind slabs (generally 10-15cms thick), that would crack when ski cut. A similar snow structure and test results were found 5 meters higher. Snowpits with Gary K. and Nate W.
