Co-ord: 38.46083N, -109.24946W  
Slope Angle: 26°  
Wind Loading: no

Stability: Fair  
Air Temperature:  
Sky Cover: OVC  
Precipitation: S1  
Wind: SW Moderate

HS: 138  
Layer Notes:  
41-0cm: Problematic layer

**Notes:** Pit is in sheltered area right at tree line. Active and previous wind loading on adjacent and nearby slopes. High winds and very active wind loading above tree line. Pit was dug near an old avalanche in Coyote Chute. A widespread cycle occurred on Dec 10 with slabs failing 2'3' deep on the basal faceted layer. This layer has been increasingly non-reactive over the past two weeks.
