mid Pebble Creek, NE Beau Fredlund Stability: HS:173 Layer Notes:

Beartooths 02/10/2022 - 11:45am Air Temperature: 156-155cm: Problematic layer

MT Co-ord: 45.03308N, -110.04080E Sky Cover: BKN Elevation: 9036 ft Slope Angle: 29° Precipitation: Wind:

Specifics: Collapsing, widespread; Recent avalanche activity on different slopes; We skied slope

Notes: Snowpit by Claude Boiteau. It appeared that the surface slab was much more cohesive today, due to warmer temps, than a couple days ago.. We experienced widespread collapsing in thinner snowpack areas, and along the mid elevation ridgelines where there was more wind affect/ 1F surface slab.
