Slope Angle:
Wind Loading:

Stability: Very Good HS:35
Air Temperature:
Sky Cover:
Precipitation:
Wind:

Layer Notes:
35-25cm: will facet this week
35-25cm: Problematic layer

Notes: Nothing notable in this pit except old except there was only 5 cm of old, hard snow. It will be interesting to see if snow on this aspect (SW) develops nsf's this week during high pressure and cold air temperatures.
