 Layer Notes:  
 69-71cm: Mostly rounded  
 71-75cm: Heavily rounded  
 89-103cm: Problematic layer

**Notes:** Layer 38-69: Dust/dirty snow at bottom 2-5cm on the layer  
 69-71: Evidence of old faceted grains, but plenty of rounding has occurred  
 71-75: Heavily rounded, evidence of old facets still present  
 89-103: Larger old faceted grains that showed evidence of rounding. Must less bonding between grains and cohesion than other rounding-facet layers
