Notes: Digging today to look at buried near surface facets from our Jan/Feb drought, buried 2/15. This terrain has been technically open since 1/23 but has not seen solid traffic numbers since this last opening on 2/26 due to traverse coverage. Path has been active with old snow slides 12/24 and 12/29. Estimated failure plane of these slides somewhere between 27-42cm from ground.
