 Co-ord: 45.02944N, -110.05953E  
 Slope Angle: 27°  
 Wind Loading:

Stability: HS:91  
 Air Temperature:  
 Sky Cover: FEW  
 Precipitation:  
 Wind: N Light Breeze

Layer Notes:  
 67-66cm: Problematic layer

Specifics: Collapsing, localized; Recent avalanche activity on different slopes

Notes: Had one large collapse (50'+ diameter), just above snowpit location. Felt I could have remotely triggered a big avalanche with more ridge walking.

Very warm temps the past 2 days, with highs in the upper 40's F at 9000' Fisher Creek.
