Layer Notes:

Notes: Loc: 100 m NW of Schweitzer top quad. Sudden Collapse on CT 19 and ECTP 25 @ 83 cm, and then informal ECTP 30+ @ 71 cm on Jan 30th SH. This SH can still easily be found here, some signs of decomposing. Distinct hardness differentiation @ 83 with RG's above. At this location, Jan 12th rain is still well intact and likely bridging.
