 Slope Angle: 20°  
 Wind Loading: no

Stability: **HS: 150**  
 Air Temperature: 32°C **PS: 5**  
 Sky Cover: CLR  
 Precipitation: NO  
 Wind: SW Calm

**Layer Notes:**  
 0-5cm: snow from last night  
 5-6cm: wind skin?  
 46-70cm: Problematic layer

**Notes:** Open area in sheltered terrain. Had a decent collapse happen in the open area surrounded by trees that we dug the pit while filling the pit in. ECTs were all non-propagating, however, one big tap on the remaining column after completing the test did propagate the rest of the block on the facet layer.
