Layer Notes:
 6-7cm: March 14 rain
 20-20.5cm: Very thin
 29-30cm: Assumed hardness
 54-55cm: Good bonds
 54-55cm: Problematic layer

Notes: Pit in glade under large cliff, probably too close to tree to avoid area with ski tracks. First look into snowpack. Sky broke during logging. S2 when skinning from KHMR to pit. SH down 54 slid well at glide friction, but had good bonds at resting friction.
