

Ohio Peak
 San Juan Range
 CO
Elevation: 11615 ft
Aspect: N
Specifics:

Bill Nalli
 03/25/2022 - 10:00am
Co-ord: 37.85798N, -107.70888W
Slope Angle: 34°
Wind Loading:

Stability: Good **HS:** 170
Air Temperature: 1°C
Sky Cover: CLR
Precipitation: NO
Wind: Calm

Layer Notes:
 125-124cm: Dust Layer
 118-100cm: Draught facets
 118-100cm: Problematic layer
 60-0cm: did not examine

Notes: Below treeline north facing sheltered area. 1F to P hard slab rests above 2mm rounding near surface facets. Stubborn to stability tests but this structure should be avoided on steep continuous slopes. ECTP 30+with Prying at 118 supports this stubborn stability.
