**HS:** 330  
**Layer Notes:**  
 300-294cm: layer compressing  
 300-294cm: Problematic layer  
 290-285cm: Dust Layer

**Notes:** Deep HS in a favored snow location. 40cm of settled storm snow on top of brown old snow surface crust. Slightly inverted about 30cm down from surface where a period of lower density snow rest below more wind-blown snow and graupel. Storm snow instabilities are settling out fast.
