

Trimmer
 Central Sierra
 CA
 Elevation: 9151 ft
 Aspect: 323°
 Specifics: Cracking; We skied slope

David Reichel
 12/15/2017 - 2:00pm
 Co-ord: 38.87985N, -119.92556W
 Slope Angle: 30°
 Wind Loading:

Stability: **HS: 106**
 Air Temperature: 5°C
 Sky Cover: BKN
 Precipitation: NO
 Wind: SW
 Layer Notes:
 97-80cm: Problematic layer

Notes: Surface conditions were highly variable. Changes in depth of wind slab within the pit seemed to account for variations in test results. Many nearby areas did not have windslab above NSFs.
