Slope Angle: 25°
Wind Loading: previous

Stability:
Air Temperature:
Sky Cover: BKN
Precipitation: NO
Wind: SW Strong

HS: 75
PF: 0
 75-50cm: hard wind slab that had sun
 40-30cm: faceting snow
 40-30cm: Problematic layer
 30-10cm: old wind slab

Notes: Ski conditions were very poor, bullet hard icy wind slab to breakable crust. Variable. Forgot ECT cord and attempted to perform one with a shovel and a snow saw but had it break on the problem layer as i was digging behind the column.
