**Co-ord:** 43.49264N, -111.00121W  
**Slope Angle:** 25°  
**Wind Loading:**

**Stability:** **HS:** 110 **Layer Notes:**  
**Air Temperature:** 70-20cm: Problematic layer  
**Sky Cover:** OVC  
**Precipitation:** S1  
**Wind:** Calm

**Notes:** forgot my snow saw and cord. did a "dirty" ECT. Got an ECTN with moderate taps but the upper 40cm of the new snow was not formed into a solid slab at the time, still very light and only semiconsolidated. LOTS of whumping during the day touring.
