

Two Oceans N
Absaroka
WY
Elevation: 10300 ft
Aspect: N
Specifics:

Trace Carrillo
12/18/2017 - 2:00pm
Co-ord: 43.74336N, -110.07888W
Slope Angle: 32°
Wind Loading: yes

Stability: HS: 185
Air Temperature: -12°C PS: 10
Sky Cover: X
Precipitation: S-1
Wind: W Light Breeze

Layer Notes:

Notes: Advisory called it low all around, and this pit seemed to back that up. Fresh cornices gave with some convincing, and wind loading was definitely present, but the snow seems to have bonded well. 3-4" of new snow overnight. Much of the new snow was stiff-ish with rime. Previous to that, a lot of wind pounded the snow from Friday into a cohesive layer. No results from CT/ECT tests however. The layers from 125cm down were extremely consolidated, and no amount of prying or bodyslamming created a failure. Some of the layers above that are questionable. But, with some settling, and in manageable terrain, I'd say it's pretty green light right now.
