

R&R
 Elk Mountains
 CO
Elevation: 11073 ft
Aspect: 250°

Zach Guy
 12/05/2022 - 11:45am
Co-ord: 38.89463N, -107.10293W
Slope Angle: 30°
Wind Loading: yes

Stability: Poor
Air Temperature:
Sky Cover: OVC
Precipitation: S-1
Wind: W Moderate

HS: 74
PS: 10
Layer Notes:
 30-20cm: Problematic layer
 12-0cm: Layer is discontinuous

Specifics: Collapsing, widespread; Cracking; Recent avalanche activity on similar slopes

Crystal Form	Crystal Size	Moisture	ρ kg/m ³	Stability tests & Layer comments
$\Delta (+)$		D		
$\odot\odot (\square)$				
\wedge	2.54			
$\odot\odot (\square)$				
\wedge	3-4	M		12-0cm: Layer is discontinuous

Notes: Dug adjacent to a large collapse and shooting crack.
