 Co-ord: 60.95835N, -149.07186W  
 Slope Angle: 33°  
 Wind Loading:

Stability: **HS: 142**  
 Air Temperature: 27°F  
 Sky Cover: CLR  
 Precipitation: NO  
 Wind: Calm

Layer Notes:  
 104-107cm: Problematic layer

Specifics: Pit dug in a Ski Area; Pit is representative of backcountry; Pit is adjacent to avalanche: crown;

Notes: This was a crown profile of what was most likely a sympathetic release from the morning's artillery mission. Our stability tests were rushed and sloppy to make the last chair, and possibly why they didn't reflect the sensitivity of our layer of concern/bed surface.
