

NW 7300' Lower LCC
Central Wasatch
UT
Elevation: 7338 ft
Aspect: NW
Specifics: We skied slope

Dave Kelly
01/27/2023 - 12:20pm
Co-ord: 40.56693N, -111.73373W
Slope Angle: 40°
Wind Loading: yes

Stability: Good
Air Temperature: -2.7°C
Sky Cover: BKN
Precipitation: NO
Wind: NW Moderate

HS: 105
Layer Notes:
105-103cm: Thin breakable crust
80-65cm: Problematic layer

Notes: Signs of recent avalanche activity on the gunners left side of the upper couloir. Lower section had signs of avalanche debris on bed surface. Throughout the tour we observed spin drift on the steep cliffs and while descending our lower boot pack was filled back in with dry loose snow falling down the cliffs.
