**Layer Notes:**  
 105-104cm: Problematic layer  
 90-89.5cm: 3mm thick  
 89.5-50cm: hardness estimated

**Notes:** Quick pit to assess buried surface hoar and basal facets. No collapsing or cracking in area. We triggered one small wind slab on a south facing cross-loaded feature. 20-30cm deep x 5m wide. Size 1 would be generous for this 45 degree wind lip. No reaction to skiing on south aspects.
