Co-ord:
Slope Angle: 25°
Wind Loading:

Stability:
Air Temperature: -8°C
Sky Cover: BKN
Precipitation: NO
Wind: E Light Breeze

HS: 210
Layer Notes:
 170-160cm: Facets above crust
 170-160cm: Problematic layer

Notes: Hazard:1/1/1

Snowpack: Variable surface conditions on all aspects and elevations. Thin sun rust on solar aspects and wind affected snow on all other aspects. Breakable crust down 0cm to 20cm between 1200m and 1700m. Faceted and unconsolidated snow (F/4F) over the Dec 26 MFcr. MFcr down 40cm-90cm and 10cm thick with facets forming above. 1F snow below. HS at 1500m is 90cm to 150cm and at 1800m is 190cm to 220cm.

Small wind slabs may be formed in isolated lee terrain features in the alpine due to limited snow available.
